Interior: Leather, green

- One of only 71 examples built
- Swiss first delivery
- Excellent condition
- Original leather interior, well documented history

The Geneva Rolls-Royce dealership L'Athenée delivered this stately Mulliner 2-Door Coupé to Zurich in 1962 to its first owner. In 1989, the Bentley was registered in England, before a German owner registered the car to himself in 2000. Registered back to its home in England from 2014, this S2 Continental was again offered to the market in 2017 by the renowned English dealer The Real Car Company Ltd. A Düsseldorf enthusiast spotted the car and promptly acquired it. The consistently good maintenance was continued. Several invoices testify to meticulous maintenance. In 2017, the transmission was overhauled. In 2021 a new high performance starter was fitted. Overall, a very imposing car that exudes an incomparable charm. The original green leather seats invite you into another world. This Bentley is rare and beautiful at the same time. It is ready to go and shines as a rare addition to any collection.
