- Original German delivery in Gelsenkirchen
- Original first registration paper on hand
- Fully traceable history, 58 years in Germany
- Fully restored
- “Certificato Di Origine” from Alfa Romeo
- Listed in the Alleggerita Register

This original Alfa Romeo GTA was completed on December 19, 1966. It left the factory the following day, bound for Germany. On July 12, 1967, the car was delivered via Alfa Romeo Frankfurt to Calor Witzel International GmbH with the license plate GE-AA30. Since then, this beautiful Alfa has changed hands seven times. All owners are known by name and can be traced without interruption thanks to the original first registration paper. Twenty-four years ago, the current owner purchased the vehicle from the nephew of Burkhard Bovensiepen (Alpina). About 20 years ago, the car was completely restored by a specialist in Germany.

The GTA brought Alfa Romeo massive success in international touring car championships in the 1960s and early 1970s. As a lightweight homologation model, it embodied the dreams of many enthusiasts during its heyday and is now a sought-after collector's item thanks to its breathtaking performance and beautiful Bertone-designed bodywork. Thanks to the extensive use of 1.2 mm thick body panels made of the alloy “Peraluman 25,” it weighed only 740 kg and, in combination with its 115 hp 1,570 cc inline four-cylinder engine, delivered breathtaking performance.
