- First delivery in Austria
- Low mileage of only 24,580 kilometers
- One of the best on the market
- In German collector's hands for 19 years
- On-board folder, on-board tools

This 2nd series Ferrari Testarossa was first delivered in 1991 by Ferrari dealer Wolfgang Denzel to its first Austrian owner Dr. Wilhelm Kreuzer in Vienna. Dr. Kreuzer had the vehicle regularly serviced before he had the sleek Testarossa taken out of service in April 2003. Since then, the Ferrari has only had one other owner, who deregistered the car in 2006. The original on-board tools, the original service booklet and the original on-board folder are included in the scope of delivery. This Ferrari has been very well maintained in the course of several inspections. The last major service with timing belt was carried out in February 2024. The Testarossa will be delivered with a fresh MOT.
