

Lamborghini Countach LP 5000S

First Registration:	09.04.1984	Capacity:	4.754 ccm
Mileage:	53.898 km	Color:	Bianco
Output:	257 KW/350 HP	Interior:	Bianco

- Sold 20 years ago by Movendi to the current collector
- First registered in Germany
- European specification, equipped with the more powerful Weber carburetors
- Matching numbers, matching color
- Major service performed in 2025, including new tires
- No. 294 of 321 vehicles built
- LP 112 C, production number 549
- Original leather interior; largely in original condition
- Coachwork by Bertone

At the 1982 Geneva Motor Show, the Lamborghini Countach finally received the 5-liter engine for which it had originally been designed. This was the Countach's first model update in four years, following a series of incremental improvements since the production version's introduction in 1974.

The 5000S was originally called the 500S, but this new designation was somewhat misleading, as the new engine had a displacement of only 4,754 cm³. Its power output was 50 bhp higher than that of the previous 4-liter engine.

Some later models featured a new rear end with an extended trailing edge, making the vehicle about one inch longer. A total of 321 vehicles were produced over a three-year period.
