- **Only 2 pre-owners with traceable history**
- **Original cardboard cover letter**
- **Overdrive, trip master**
- **In unrestored, original condition**

This MG B Roadster was delivered new in 1972 to photographer Inge Metzger in Erkrath. She drove this red convertible for 41 years, always in good weather, and sold the car in 2013 to its current second owner due to her age. The original cardboard cover letter is available. The car has been part of a classic car collection for the last 13 years and was only driven in the summer when the sun was shining. The roof was replaced two years ago. The car has always been serviced by workshops or experts from the classic car scene. The previous owner installed an analog Tripmaster. The rear axle was upgraded with a Spax shock absorber unit. Over the last 5 years, the fuel pump, exhaust, alternator, ignition coil, and radiator have been replaced. The car is in unrestored original condition.
