- **Classic color combination**
- **1st prize MG Car Club 2014**
- **One of 9,602 vehicles built**
- **Sought-after example with 1500 cc**

This MG TF was meticulously dismantled down to the last screw and completely restored in the Netherlands at great expense. All invoices and over 500 photos document the work. Most parts of the chassis are powder coated. The engine has a better camshaft and has been converted to unleaded fuel. The fittings have been completely overhauled and a new wiring harness has been installed. All chrome parts have been replaced or re-chromed. A stainless steel exhaust system has been installed. The soft top and tarpaulin are in mint condition. The current owner purchased this MG 11 years ago for just under €50,000 and has only driven it in beautiful weather. The vehicle is now being sold due to age. Two folders with invoices and documents are available.
