On July 16, 1960, this beautiful Mercedes-Benz 190 SL left the factory in Stuttgart and was shipped to the United States, where it remained until 1983. In mid-1983, the vehicle was re-imported to Germany and registered in Munich. Since then, it has been owned by a total of three owners in Germany. Significant investments have been made in the vehicle during this time. Numerous invoices from the past 33 years are available, ensuring that this beautiful convertible is currently in excellent condition. Two appraisals confirm a vehicle value of €100,000. A major inspection was performed at the end of 2023, just 330 km ago. The vehicle is in excellent condition and comes with a fresh MOT inspection.
