Output:	55 KW/75 HP	Interior:	Leather, Black

- Restored and documented accordingly
- Engine overhaul documented with photos and video
- New MOT
- Historic license plate
- Luggage rack and chrome rims

Originally delivered in the USA, the attractive convertible found its way back to Germany in 1992. The current owner initially stored the Porsche and it was only a few years ago that it underwent an extensive restoration at the Thissen master workshop in Kleve. According to the photo documentation, the vehicle was completely dismantled and rebuilt. A revised Porsche engine with 1,600 cc and 75 hp was installed. In 2021, the Porsche was repainted and completed. At the end of 2022, the TÜV inspection was carried out in accordance with § 21 StVZO, for classification with H license plate and classic car use. Only very few kilometers have been driven from completion until today, so there is no maintenance work. The MOT was renewed in mid-May 2025.
