- **First registered in Germany (C00), 3 pre-owners**
- **Perfectly documented history, full service record**
- **Mostly original paint, German "H" license plate**
- **Many new parts, including brakes, control arms, tires, etc.**

Originally delivered through the Porsche Zentrum Ruhr-Lippe in Recklinghausen, this beautiful 964 was first registered in Wuppertal on September 11, 1989. The original Porsche owner's folder, containing the service booklet and numerous service entries, is included. The collected documents also contain maintenance invoices from reputable repair shops. Over the past 10 years, the vehicle has been serviced exclusively by Boxermotor in Dortmund. Consequently, one can assume that the vehicle has been well maintained mechanically. In 2001, the vehicle's power was increased to 300 PS. A TÜV parts certificate is available for this modification. The Porsche has been registered exclusively in Germany and currently holds an approval under § 23 of StVZO (German Road Traffic Licensing Regulations) to display an "Historic" H licence plate. Based on the documentation, the vehicle's history and mileage are very easy to trace. There are no outstanding service intervals, so the new owner can look forward to spirited drives in this exceptional vehicle.
