- **Originally delivered in Germany via Porsche Kurpfalz**
- **One of only 245 units produced for the German market**
- **Has been with the current owner for 23 years**
- **Turbo seats, wind deflector**

This Porsche Speedster was originally delivered through Porsche Zentrum Kurpfalz in Mannheim and is therefore one of only 245 964 Speedsters produced for the German market, which is why it bears the country code C00.
The car's first owner sold this Speedster to a buyer in Italy two years later. There, on November 29, 1996, with a mileage of 19,861 km, the car underwent a service at Porsche Arezzo. The current owner purchased the Porsche 23 years ago and has driven it only occasionally since then. The 964 was serviced by the Porsche Center Niederrhein and the Sportwagen Werk Neuss. The last service was performed on October 10, 2025. A custom wind deflector was fabricated for the car, and the dials were painted white. The original service book is, of course, also included.
