- Sought-after works turbo look WTL
- Proven very low mileage
- Checkbook maintained; still in original paint
- Full leather interior with piping in body color
- In current ownership for 11 years, German H license plate

Very nice 964 convertible in works turbo look with very exclusive equipment. Originally delivered in Doha and driven there by 2 owners for only 3,515 km, the Porsche was exported to England at the end of 1995. The English owner had the car serviced at Porsche workshops a total of 6 times between 1996 and 2006, covering a total distance of just under 19,000 km. The Porsche came to Germany at the end of 2007 and was registered by HR-Sportauto in Mayen. There it received its major inspection in 2012, with a mileage of 25,961 km. The current owner, a collector from the Rhineland, added the convertible to his collection in 2014 and has only driven 1,320 kilometers with it to date. He keeps an exact logbook with the date and the respective kilometers. All MOT reports and service invoices from this period are available, so that the very low mileage for 33 years can be traced. In addition, there are three appraisals that attest to the car's impeccable condition. A great opportunity for convertible fans of the Porsche brand and classic car enthusiasts.
