- Cargraphic performance upgrade registered

This very classy configured Porsche 911 / 996 Turbo, with a very comprehensive spec, was delivered to its first owner on 20.06.2002 via the Porsche Center Frankfurt/Main. The costs for the special equipment amounted to approx. 15,000.00€. The special equipment includes the steel sunroof, the Bose sound system, the special color of the instruments, cruise control, sports seats, seat heating, parking aid, the 3-spoke sports steering wheel, etc. The first 8 inspections were all carried out at Porsche Centers. In addition, there are numerous service invoices in the documents. The original Porsche service booklet is also available. The vehicle shows no damage or service backlog, so this Turbo is ready for immediate use. A very nice opportunity to own and drive a Porsche Turbo at a fair price.
