- First delivery via BMW Spicker, Duisburg, Germany
- Fully restored beginning of 1980's
- Great condition
- Good documentation with many pictures
- Rudge tires, luggage set with three bags

The BMW 507, designed by Graf Görtz as a counter-draft for the Mercedes 300 SL of the competitor from Stuttgart, is regarded as the icon of automobile design par excellence. At production times, only 252 units were built, far less than Mercedes' competitors. Today, these vehicles are all the more sought-after. Owning such a vehicle means climbing into the Olympus of the classic car collector.

This BMW 507 was delivered to Duisburg and registered in Switzerland a short time later. In the mid-1980s it returned to Germany, where it was extensively restored. Even today, the paintwork still impresses with its quality. Since the 1980s, this BMW has been registered in Germany and has been in German collector's hand since then.
